

March 2018 - NEWS FOCUS

Welcome to the latest edition of Active Silicon's News Focus. We've compiled some of the recent news posts trending on our social media channels to keep you up to date with developments from us, and from the wider vision industry.

Active Capture - for image acquisition, analysis and display

We are excited to announce the launch of **ActiveCapture** – our latest front-end software for **FireBird frame grabbers**. The software application allows the user to access and control all installed cameras and frame grabbers in a clear and intuitive manner.

Active Silicon AI Series part 6: Artificial Intelligence and embedded vision revolutionizing wearable device capabilities

We all marvel at new products being introduced to the consumer market such as phones that can be unlocked by facial recognition, advanced **VR** and **AR** in gaming and drones that can spy on our neighbours. These products are having an impact in industrial environments too, where running Artificial Intelligence software applications on wearable devices benefits capabilities, speed and security.
