Regulation Compliance Statement

REACH

Regulation (EC) 1907/2006

Statement Issue Date: 8th August 2018

Products Covered: All products manufactured by Active Silicon unless the product is specifically stated otherwise.

Note: This is a General Statement - please contact Active Silicon if you require a product specific (by Part Number) declaration.

REACH (Registration, Evaluation, Authorization and Restriction of Chemicals, EC 1907/2006) is the European Union's (EU) chemical substances regulatory framework. REACH requires Active Silicon to provide customers with sufficient information on Substances of Very High Concern (SVHC) contained in products in concentration above 0.1% weight by weight (w/w) to allow safe use of the product.

To comply with this requirement, Active Silicon certifies that to the best of its knowledge all products that it manufactures and supplies do not contain substances listed on the Candidate List of Substances of Very High Concern, as updated on 27th June 2018, in a concentration above 0.1% weight by weight.

Validation Method

Active Silicon subscribes to a materials declaration service from Silicon Expert Technologies, Inc., which gathers declaration statements from electronic component manufacturers and distributors. This service is used by Active Silicon to validate the components used in our manufacturing process against various regulatory requirements, including REACH. This service will notify Active Silicon of any changes in the compliance status of components we use and the products we manufacture.
