

AF-Zoom Cameras with Extremely High Zoom

Harrier AF-Zoom cameras offer **10x up to 55x zoom**, delivering incredibly detailed and accurate imaging in a very compact and lightweight unit.

Specifically engineered for versatility and performance, these cameras deliver exceptional results across various applications.

Featuring our most powerful zoom, the **Harrier 55x AF-Zoom Camera** is a 5MP high-resolution camera. Experience seamless Full HD real-time video with flexible output options including LVDS, Ethernet IP, HD-SDI, HDMI and USB.

The next generation of AF-Zoom cameras

These cameras are ideal for applications requiring precise image acquisition and video capture where the camera cannot be placed near to the source, such as remote monitoring and high-end surveillance.

Their small size and easy remote control using **Serial VISCA or Pelco-D/P Control Protocol** make them perfectly suited to mounting on UAVs and ROVs. The **Harrier 55x AF-Zoom Camera**, with its dimensions of just **101 x 54 x 64 mm**, integrates into any payload configuration.

High zoom AF-Zoom IP cameras

As Ethernet IP imaging systems require low latency video streaming, Harrier IP camera hardware and firmware have been optimized to **reduce latency to a minimum**.

Harrier IP cameras are available with Wi-Fi and PoE (Power over Ethernet), further enhancing the functionality of these versatile block cameras.

Global shutter cameras with 36x optical zoom

For imaging dynamic scenes, we offer the **Harrier 36x AF-Zoom Camera with Global Shutter**. A global shutter sensor can avoid distortions that are often encountered with rolling shutters when capturing fast-moving objects.
