

2019 - A Year of Events

For Active Silicon the events calendar 2019 started with the Embedded World Show in Nuremberg, Germany. Read our synopsis of this show and see where else you can meet us, see our products and discuss your vision system requirements.

February - Embedded World

Active Silicon reports from Embedded World 2019

This year's **Embedded World** reflected the diversity of sectors engaging in embedded technology, with niche manufacturers competing for attention with giants like Amazon Web Services (AWS). The main focus was on embedded processor boards and a number of suppliers had made the journey from China and Taiwan.

News from the **PC/104 consortium** is that they're working on a roadmap for PCIe Gen3, and **PCIMG** are suggesting a next generation "type" for COM Express called COM HPC. Overall, the show felt dynamic, with a number of exhibitors planning and even introducing smaller and faster processors. Major players Xilinx and Intel continue to dominate the market but it was encouraging to see such a large number of smaller organizations with innovative chips.

March - Korean Vision Show

Automation World 2019

Visit our Korean distributor, **Onvision**

Automation World focuses on machine vision, industrial image processing and IIOT elements.

Find **Active Silicon frame grabbers** showcased at the **Onvision** booth:

- Quad CoaXPress frame grabber with CXP-12 technology
- Live demo of **Firebird 4xCXP-6**
- **Camera Link frame grabbers**

May - Machine Vision Roadshow

The **Machine Vision Roadshow** tours **Germany, 13 - 24 May**

The **Machine Vision Roadshow**: Experts in **frame grabbers, lighting, cameras, lenses, software** and **integration** get machine vision on the road. We'll be visiting workplaces to demonstrate our leading-edge technologies.

Participating companies: Active Silicon, Büchner Lichtsysteme, JAI, Kowa Optimed, Pyramid Computer and Q.VITEC.

May - New-Tech Exhibition

New-Tech Exhibition 2019

28 - 29 May 2019
Tel Aviv, Israel

See our products at  **OpteamX**
VISION IT BETTER

High-Tech & Electronics exhibition in Tel Aviv, Israel

Visit our distributor **OpteamX** to see the following Active Silicon products:

- **Harrier 3G-SDI camera interface** board for Tamron, Sony and other AF-zoom blockcameras.
- **FireBird CoaXPress and Camera Link frame grabbers**

June - UKIVA Machine Vision Conference

Share and discuss the latest developments in the machine vision industry

Alongside high quality technology talks, companies will also exhibit their latest products and solutions.

Visit our presentation "**HD digital video in robotics**" and let us show you our latest **products** and services at the Active Silicon stand.

October - Embedded VISION Europe

24-25 October 2019
ISC Stuttgart
Germany

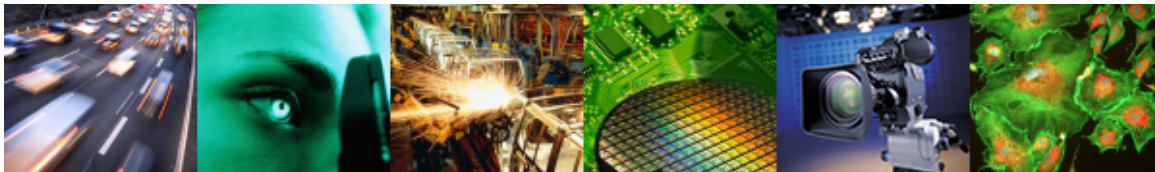

Conference and exhibition for Embedded Vision

Active Silicon manufactures **embedded vision systems** that meet the highest quality standards and are designed for long product life.

Come and see our latest developments in embedded technology.

Active Silicon is a leading manufacturer of imaging products and embedded vision systems. If you would like to stay informed of upcoming events, products and news in general, then please follow us on one of our social media channels below.
