

March 2021 - EVENT FOCUS

[View this email in your browser](#)

Active Silicon at Vision China Shanghai

The China International Machine Vision Exhibition & Conference on Machine Vision Technology and Industrial Applications will open its doors at the Shanghai New International Expo Center on **17th March 2021**. We're delighted to be joining the line up at the **Vision China Show**, one of the most influential and well-attended events in the Asia Pacific calendar.

Our partners, **Dongguan MiVision Technology** (booth OV53) and **OPTIGER** (booth W1.155) will be displaying our products and talking delegates through the benefits of our industry-leading technology.

See our latest Firebird frame grabbers, **4xCXP-12 CoaXPress**, which are capable of transmitting data at 12.5 Gbps per link. 4-lane and 8-lane variations are available and CXP v2.0 and GenICam are supported.

The ActiveDMA engine enables acquisition with **zero CPU usage**, and the

boards come with our **innovative ActiveSDK software**.

We'll also have our high-speed **Camera Link frame grabbers** on view.

Live demo - CoaXPRESS frame grabber

OPTIGER will be running a live demonstration using our frame grabber to simultaneously acquire and display high-quality, real-time images from four cameras.

Find **contact details for our partners** on our website, and view our range of **frame grabbers** and **camera solutions**.

If you can't make the show but want to know more about our machine vision expertise, **get in touch**.
