

## What can you see at VISION 2018?

This bi-annual event returns to Stuttgart on 6-8 November and, as usual, is attracting all the major players in the vision industry, including Active Silicon.

---

### Live demos

We will have an assortment of our products on display at our exhibition booth including a selection of live demos:

- Our **Vision Processing Unit**, an embedded computer designed for use in industrial or medical OEM applications, demonstrating live acquisition from four USB3 Vision cameras.
- The latest **Camera Link and CoaXPress frame grabbers** including our new 4-link CXP-12 CoaXPress frame grabber and the cost-optimized single-link CoaXPress board.
- Watch our frame grabbers in combination with a **GPU** in a live demo, processing data in real-time.
- Our exciting new **Harrier series** will be on display – a camera interface board family which fits neatly onto Tamron, Sony and other auto focus zoom cameras to enable real-time, **HD digital video transmission over long cable lengths** of up to 700m.

Come along to booth **1H52** to have a look and chat to our experts.

Visit us at our booth 1H52  
Stuttgart, 6 - 8 November 2018

## Win an iPad

We'll be running our popular competition again for someone to go home with a new iPad – visit our stand to find out more.

## Understanding processing with GPUs

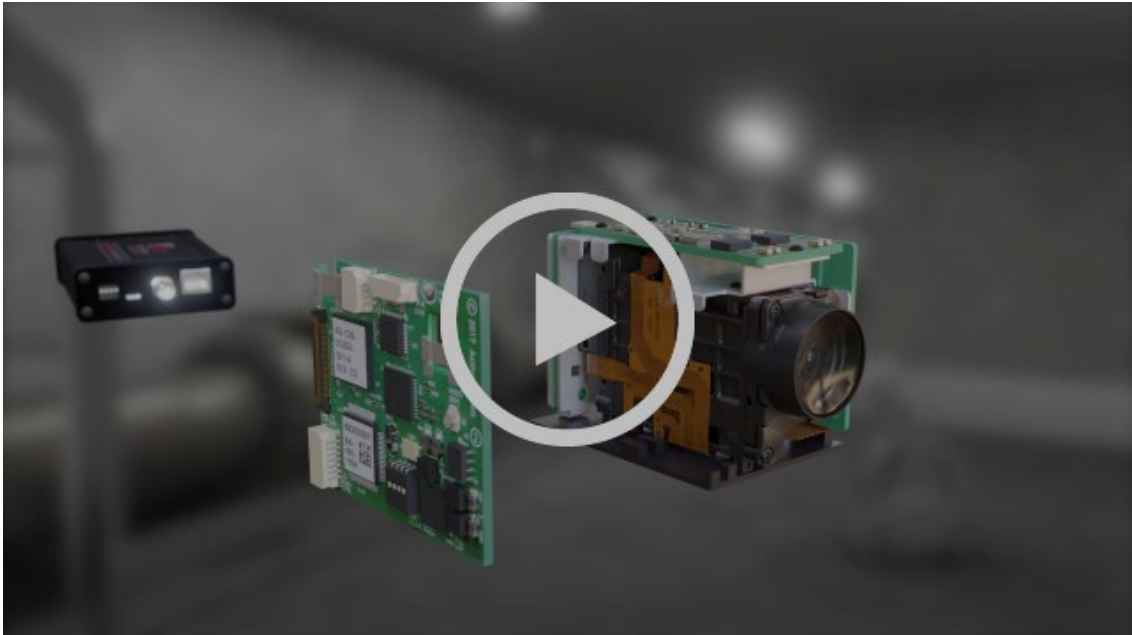

Frans Vermeulen, our Head of Sales and Marketing, will be delivering a presentation entitled *High-speed image acquisition with real-time GPU processing*. This is aimed at explaining the pros and cons of **processing on a GPU** to help you make informed decisions about developing your systems. The presentation will be on **Wednesday, 7 November at 15:30 in Gallery Hall 1** and we look forward to seeing you there.

## Come and chat to us

If you have a need for high-speed image capture and processing and require reliable, customizable, long-life imaging products then you can't afford to miss meeting us in Stuttgart. We hope to see you there!
