Welcome to the latest edition of Active Silicon's News Focus. We've compiled some of the recent news posts trending on our social media channels to keep you up to date with developments from us, and from the wider vision industry.

Computer vision and facial recognition in today's world

Facial recognition was just on the pinnacle of being accepted in certain applications as part of everyday life, but then the COVID-19 pandemic struck, and masking your face became the norm. What impact has this had on the technology?

The role of computer imaging in post-operative practices

Medical imaging plays a vital role in collecting data for post-operative analysis. Implant surgery is one area where there's an obvious use for imaging after the procedure, but post-operative imaging is present in many other fields.
