

# Product Discontinuation Notice

<b>Part Numbers:</b>	<b>SNP-PCI-8</b> <b>SNP-PCI-24</b> <b>SNP-PMC-DIG16</b>	<b>SNP-PMC-8</b> <b>SNP-PMC-8-CC</b> <b>SNP-PMC-24</b>
<b>Date Of This Notice:</b>	<b>20 October 2012</b>	
<b>Product Original Release Date:</b>	<b>1995</b>	
<b>Last Time Buy Date:</b>	<b>30 October 2013</b>  It is difficult to estimate the quantity of Snapper products that can still be manufactured, due to the availability of obsolete parts (see reason for change below). This date is the last date that Active Silicon will accept an order, but only when we have received a valid order will be able to confirm that sufficient obsolete component stock is still available and that we can manufacture the requested quantity.	
<b>Last Delivery Date:</b>	<b>30 October 2014</b>	
<b>Reference:</b>	<b>DN-DCXX-0007</b>	

<b>Description:</b>	Active Silicon is issuing a last time buy notice for the <b>Snapper</b> frame grabber product range.	
<b>Reason For Change:</b>	Due to the obsolescence of key components used in the manufacture of Snapper products it is becoming increasingly difficult to guarantee the long term supply of the Snapper frame grabber boards.  As well as component obsolescence, the analog RGB and parallel digital video interfaces found on the Snapper are being replaced by newer digital formats such as Camera Link, CoaXPress and GigE Vision.	
<b>Suggested Alternatives:</b>	SNP-PCI-8, SNP-PMC-8: SNP-PCI-24, SNP-PMC-24: SNP-PMC-DIG16:	See LFG range for certain applications. No direct replacement. See Phoenix and FireBird range.
