Description of change:	The KEL30 cable that connects the camera interface board to the camera will be reduced in length from 100mm to 50mm.		
Affect that change has on operation:	None: No affect on the fit, form or function.		
How to identify original and changed product:	The cable is clearly visible on the assembled camera modules. The 100mm cable is long and usually has a loop in it to take up the excess cable; the 50mm cable is not long enough to have a loop. The labels on the base of the cameras and packaging will show different MA- numbers.
